**AURI**

**is a national  
think-tank  
for architecture and  
urban policy.**

**( a u r i**

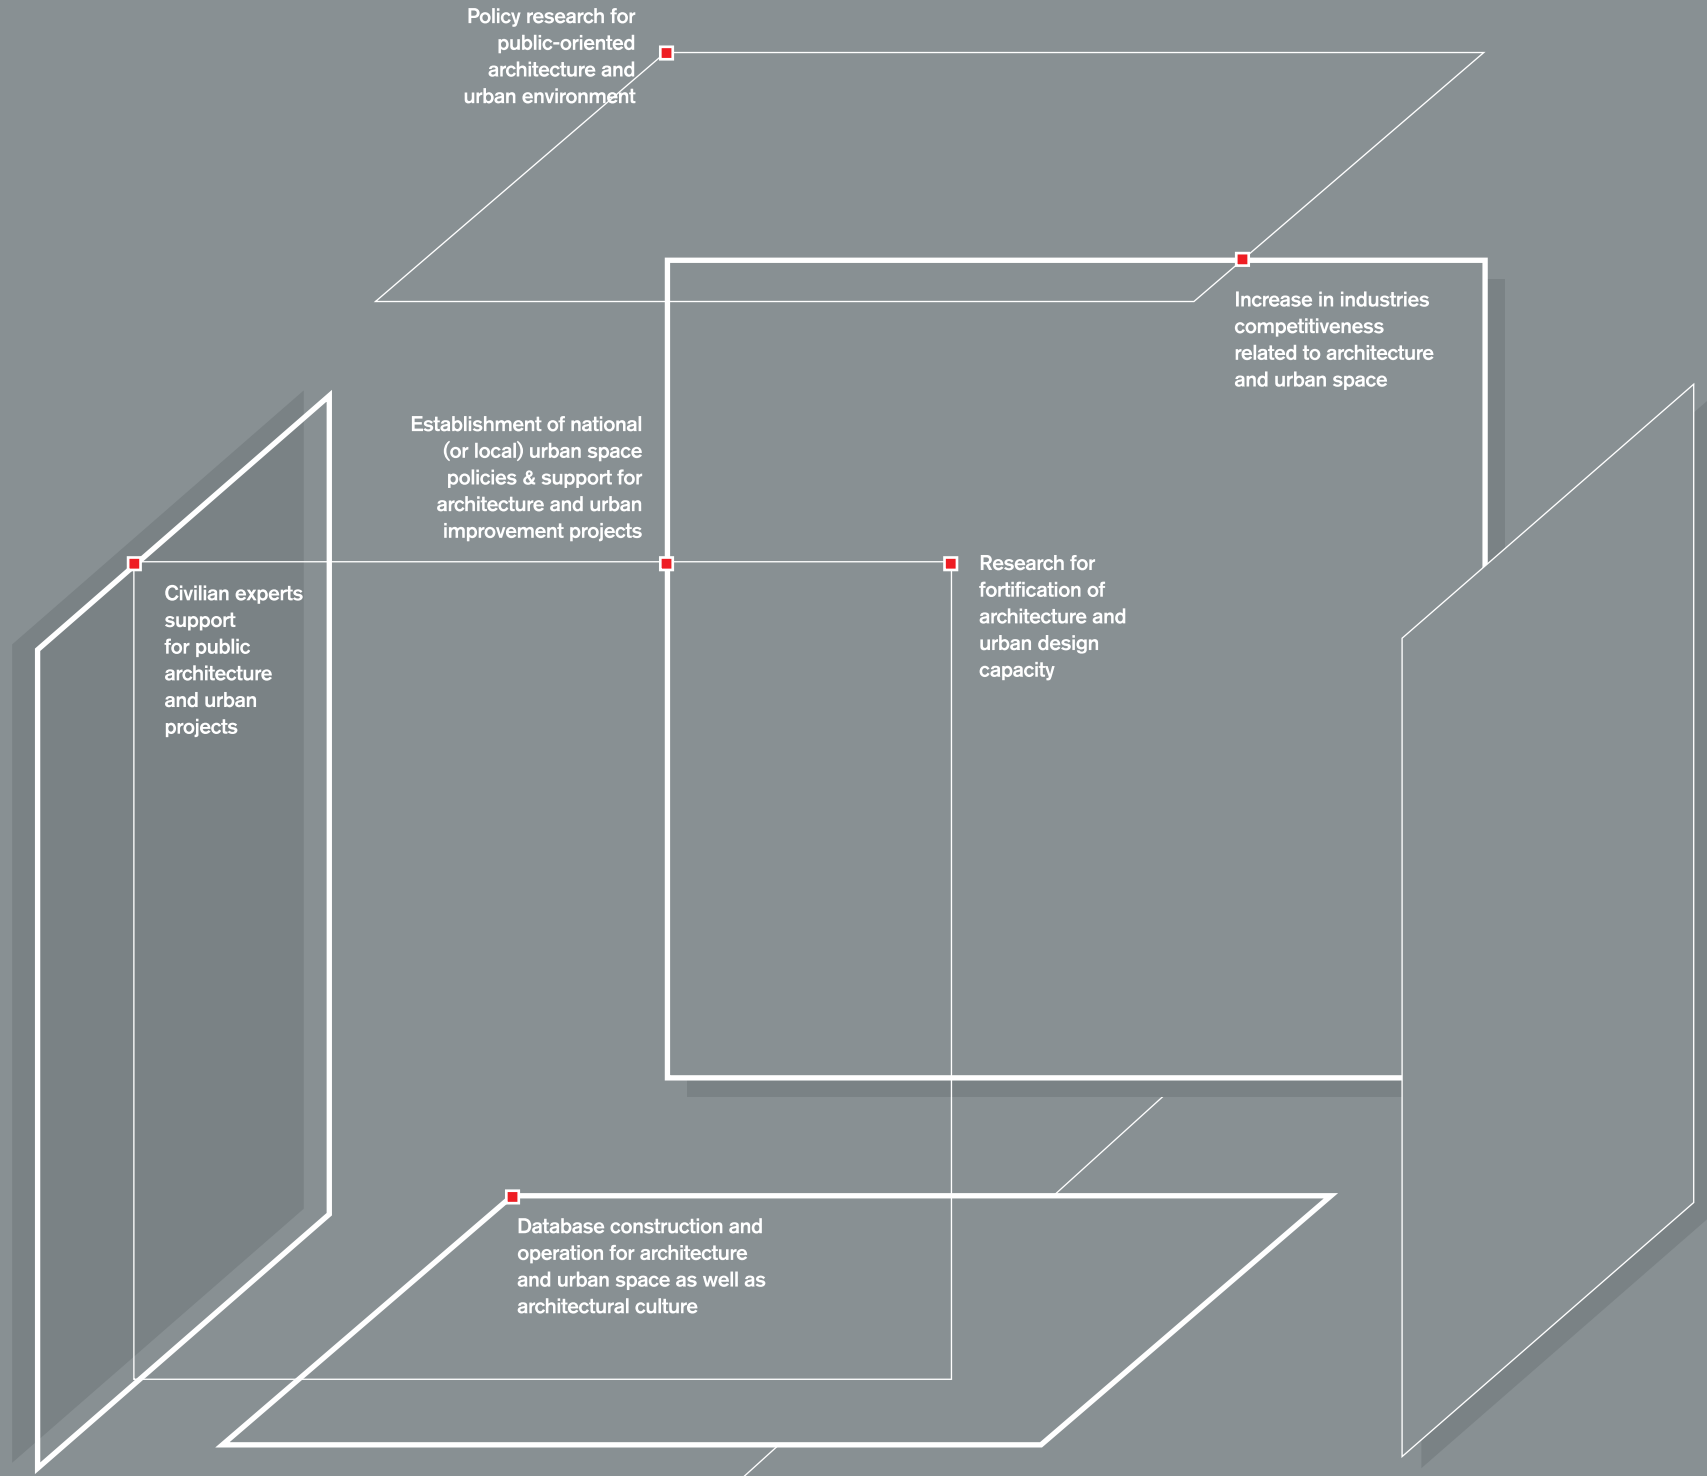

## Our research objective is to establish sound and vibrant spaces for happy and wholesome life

Stable policy foundation, proper system and concrete implementation (actualization) need to be prepared through professional research on architecture and urban space. The Architecture & Urban Research Institute is where research-based policies find their beginnings.

Supports construction of future-oriented architecture and urban-spatial systems

Promotes sustainable growth and urban architecture

Serves as a think-tank for advanced architecture and urban culture

## We are growing as an institute, going from 'the first' to 'the best'

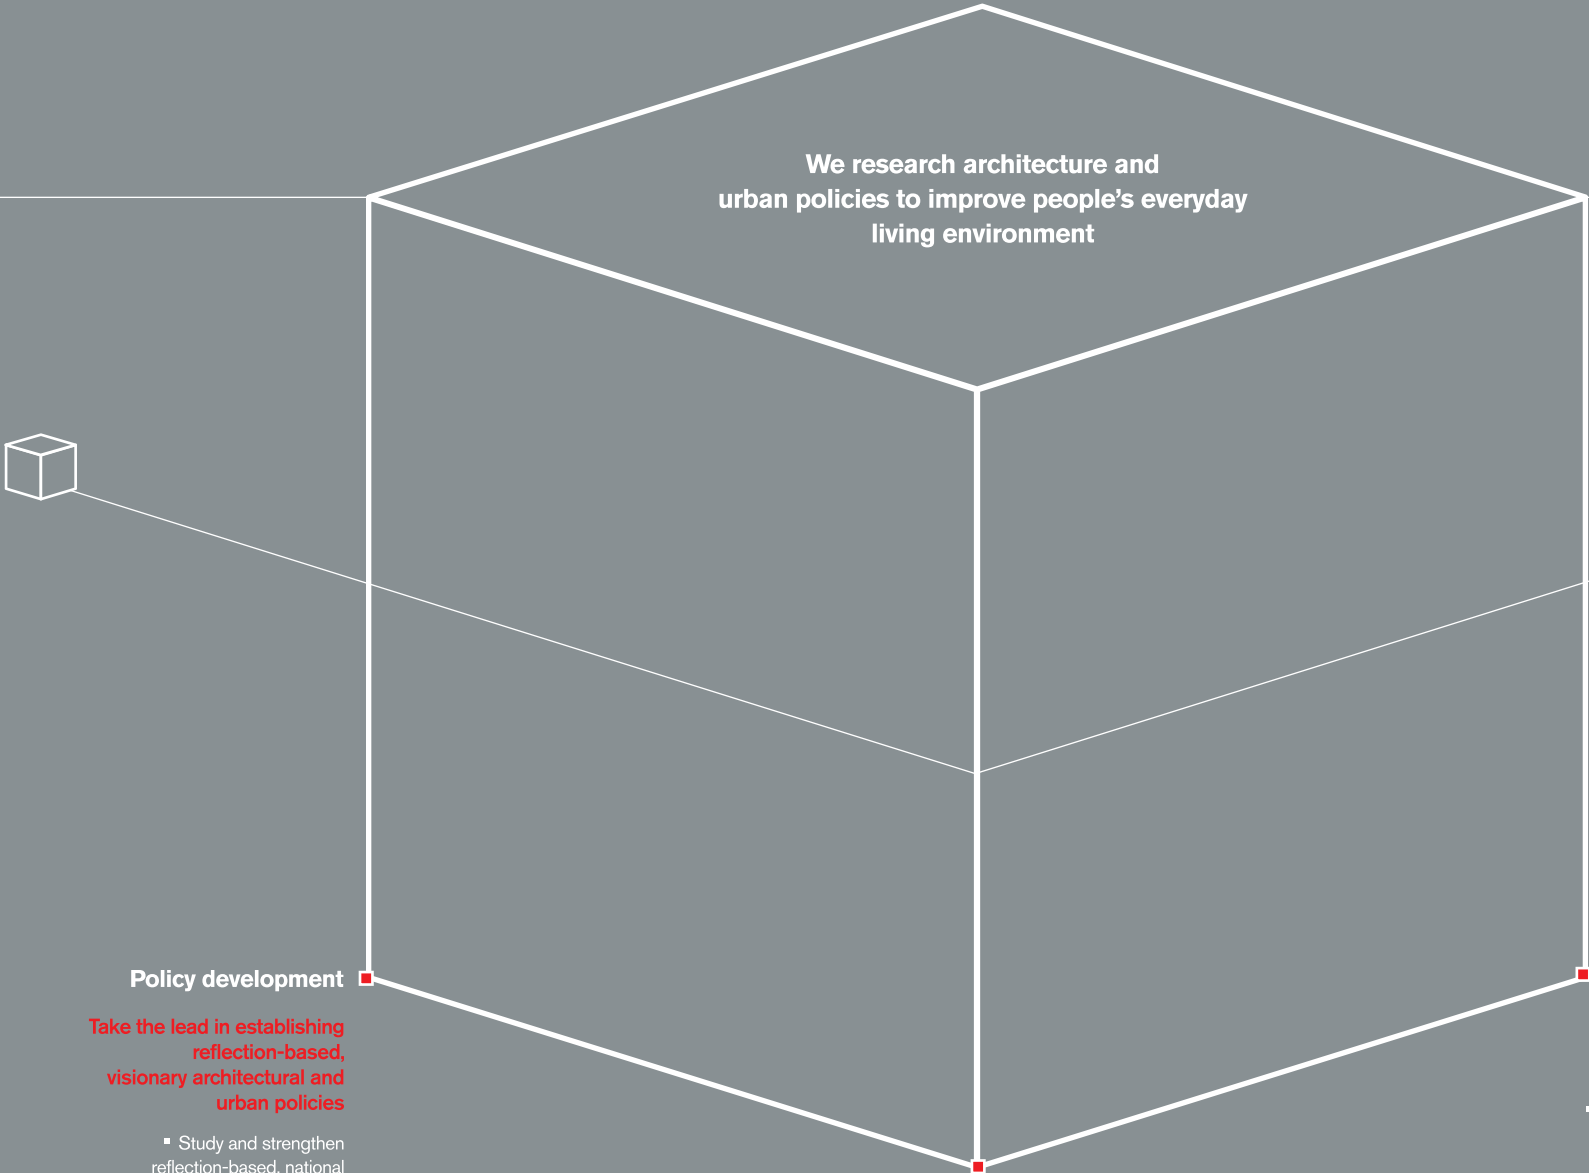

The Architecture & Urban Research Institute, placing new value on an architectural culture and laying the foundation for desirable architectural and urban environment, has organized various policies following its launch in 2007 and persistently expanded its breadth of research for continual growth.

Enriching the everyday  
through localized,  
multidimensional service

Our ideas become laws  
as well as foundational knowledge  
for new and unique research  
that will become resources  
necessary in constructing an  
architectural culture.

The singular goal the Architecture & Urban  
Research Institute hopes to accomplish  
through research is a more prosperous  
future for all citizens.

Policy development

Take the lead in establishing  
reflection-based,  
visionary architectural and  
urban policies

- Study and strengthen reflection-based, national architectural policies
- Steer future direction of architectural and urban policies through analysis of current trends

Research service

Expand spatial environmental  
research through on-site response

- Expand field-based regional and local research service
- Become leaders in innovative spatial research based on advanced policy data
- Expand client-centered research together with an information service

Collaboration enhancement

Strengthen creative research capacity  
and create a fertile environment for  
collaborative research

- Strengthen research systems based on union of new technology with multidisciplinary systems
- Strengthen domestic and overseas research networks and human resources management system
- Optimize research environment and revitalize organizational culture of prioritizing research

Through a reflective and practical approach to research, AURI pursues architecture and urban space services to enrich our everyday lives.

For the past ten years, since its founding in 2007, AURI counts a great number of accomplishments with a vision dedicated to “the people’s happiness and a nation’s refined architectural and urban culture.” AURI has strived to provide public policies that would lay the foundation for the ideal living environment. It has worked for the improvement of related laws and systems, as well as for progress of plans, policies, and projects. Commemorating its 10th anniversary, AURI now envisions the next ten years with both pride and humility. During an era of compressed growth, we tend to focus on pursuing development in response to political, economic, and social demands of the time, rather than basing it on our common values or the characteristics of our architectural and urban spaces. We believe it is now time for more reflection and communal discussion on the fundamental questions of what architecture and urban space means to us and which spatial services are in demand in present society.

AURI aims to provide the national architectural agenda through reflection and discourse that stems from practical research and is of substantial assistance to our everyday lives. Success is to be measured by the approval coming from the general public, rather than through debate amongst professionals. This will enhance regional spatial services for a better quality of life; refined services will also necessitate interdisciplinary convergence using new smart technologies. In addition, AURI strives to both globalize and localize its approach to architectural and urban spatial inquiry through increased collaboration with research organizations across the world.

Your continued support, encouragement, and input to AURI as we take our next steps toward the future are greatly appreciated.

Thank you.

President of AURI **Park, Sohyun**

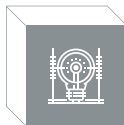

The leader in advising  
the nation’s  
architectural and  
urban policies

AURI endeavors to live up to its promise  
of enhancing public natural spaces and quality of  
architecture and urban environment  
through in-depth policy research.

research on  
**public buildings**

- + research on improving quality of public buildings
- + research on effective planning and design process management of public buildings
- + research on comprehensive plans for public buildings

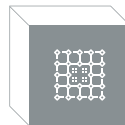

research on  
**national landscape design**

- + study on resources of national landscape and ways for practical use
- + research on policies to design landscape at the national level
- + research on improving national land environmental design

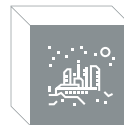

research on  
**green architecture and cities**

- + research on policies for green architecture cities that respond to climate change
- + establish basis for green architecture cities including data analysis on national building energy
- + analysis on trends in green architecture technology

research on  
**pedestrian environment**

- + research on improving laws related to pedestrian activity
- + development of comprehensive assessment on pedestrian environment

research on  
**crime prevention through environmental design (CPTED)**

- + research on environmental designs for crime prevention
- + research on guidelines and certification systems in environmental designs for crime prevention

research on  
**architecture-related institutions**

- + research on advancing architecture-related institutions
- + research on governance of building agreements and cooperative systems
- + research on space policies of the central and local governments
- + research on space welfare adaptive to social change

research on  
**architectural services industry**

- + research on invigorating the architectural services industry
- + research on standardization of architectural services
- + a study on the current status of architectural services industry

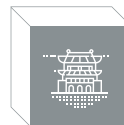

research on  
**analysis related to architecture and cities**

- + data collection and analysis on trends in architecture policies
- + analysis of statistics in architecture and architecture services industry
- + establishing database of architectural assets

research on  
**urban regeneration**

- + research on policies to invigorate urban regeneration and develop institutions
- + research on policies based on management (monitoring) of urban regeneration business
- + research on ways to develop customized town recycling businesses

research on  
**Hanok**

- + research on preservation of Hanok and development of its culture
- + study and analysis on distribution of Hanok and trends of its industry
- + research on ways to support supply of Hanok and its industrialization

research on  
**architectural culture**

- + research to discover values of architectural assets
- + research on promotion and education of architectural culture
- + research on ways to globalize architectural culture

With a boundless inquisitive spirit,  
we have pioneered changes  
in our country's architecture and  
urban spaces

AURI, established in 2007, has raised the standard for  
our architecture and urban spaces,  
and has contributed to the formation of related policy.  
We hope to continue this model of pursuing changes through  
reflective and make-sense research into the next decade.

2006

**2006. 06.**  
The President ordered the establishment of a state-run research institute in the field of architecture and cities during the reporting of the Presidential Committee on Architectural Culture & Construction Technology.

2007

**2007. 03.**  
The Articles of Association of the KRIHS was revised (National Research Council for Economic and Social Sciences).

**2007. 06.**  
AURI was founded and Mr. Yeong-Te Ohn was inaugurated as its first president.

**2007. 08.**  
Opening Ceremony of AURI was held.

**The Framework Act on Architecture**  
enacted, 2007

Strategies to Improve the Effectiveness of the Regional Architectural Policy (2015)

Architectural Policy Recommendations in Response to the Changing Policy Environment (2013)

2009

**2009. 12.**  
Mr. Se-Kwan Son was inaugurated as the second president.

2010

**2010. 01.**  
Pedestrian Environment Research Center was established.

2011

**2011. 05.**  
Opening Ceremony of National Hanok Center was held.

2012

**2012. 09.**  
Mr. Hae-seong Je was inaugurated as the third president.

**2012. 12.**  
Architectural and Urban Policy Information Center was established.

**Green Building Act**  
enacted, 2012

Incentivizing Green Building: Easement of Building Regulations and Contributed Acceptance (2016)

Zoning Regulations and Greenhouse Gas Management Policies in Building Sector (2014)

Green Building Planning Guidelines for Local Governments (2014)

Policy Survey for Green Building Masterplan in Korea (2012)

Establishment of Systematic Basis for Activation of Green Building (2011)

2013

**2013. 06.**  
Green Building Center was established.

**Architectural Services Industry Promotion Act**  
enacted, 2013

A Study on the Institutional Improvement for the Architectural Service Promotion (2013)

Architectural Policy Recommendations in Response to the Changing Policy Environment (2013)

The Establishment and Operation of the National Public Architecture Center I (2011), II (2012)

A Study on the Enactment of Architectural Service Promotion Act (2011)

A Fundamental Study for the Amendment of Building Act (2010)

**Urban Regeneration Act**  
enacted, 2013

The Suggestions of Improvement Schemes for Urban Regeneration Act (2015)

Operation Strategies for the National Urban Regeneration Assistance Agency (2014)

A Study on the Support System for Urban Regeneration and Practice Cases (2013)

**Landscape Act**  
revised, 2013

The Improvement of Landscape Management System in Historical and Cultural Environment Preservation and Promotion District (2016)

Encouraging Citizen Participation in the Process of Townscape Planning (2009)

**Special Act for Management of Abandoned and Unfinished Building**  
enacted, 2013

Addressing Abandoned Buildings : Survey Methodology (2014)

Addressing Abandoned and Unfinished Buildings Management : an Institutional Framework (2013)

2014

**2014. 02.**  
Designated to Urban Regeneration Support Organization.

**2014. 11.**  
Opening Ceremony of National Public Building Center was held.

Designated to Building Agreement Support Center.

**Hanok and the Architectural Heritages Act**  
enacted, 2014

Implementation Issues for Architectural Assets Promotion District (2015)

Research on Policy for Designation and Operation of Architectural Assets Promotion District (2014)

A Study on Systems for Compile the List of Architectural Asset and Use of the Inventory (2013)

Policy Review for Introducing Hanok Certification System (2013)

2015

**2015. 01.**  
Architectural Services Industry Promotion Center was established.

**2015. 06.**  
Designated to Architecture Regulation Monitoring Center.

**2015. 08.**  
Relocation to Sejong city.

**2015. 09.**  
Mr. Dae-Ik Kim was inaugurated as the fourth president.

2016

**2016. 01.**  
CPTED Research Center was established.

2017

**2017. 11.**  
Ceremony of AURI's 10th anniversary was held.

2018

**2018. 01.**  
Architectural Culture and Asset Center was formed.

**2018. 05.**  
Ms. So-hyun Park was inaugurated as the fifth president

2019

**2019. 01.**  
Designated to Smart City support Organization.

**Building Management Act**  
enacted, 2019

Suggestions for Improvement of Laws and Regulations regarding Building Maintenance and Deconstruction(2017)

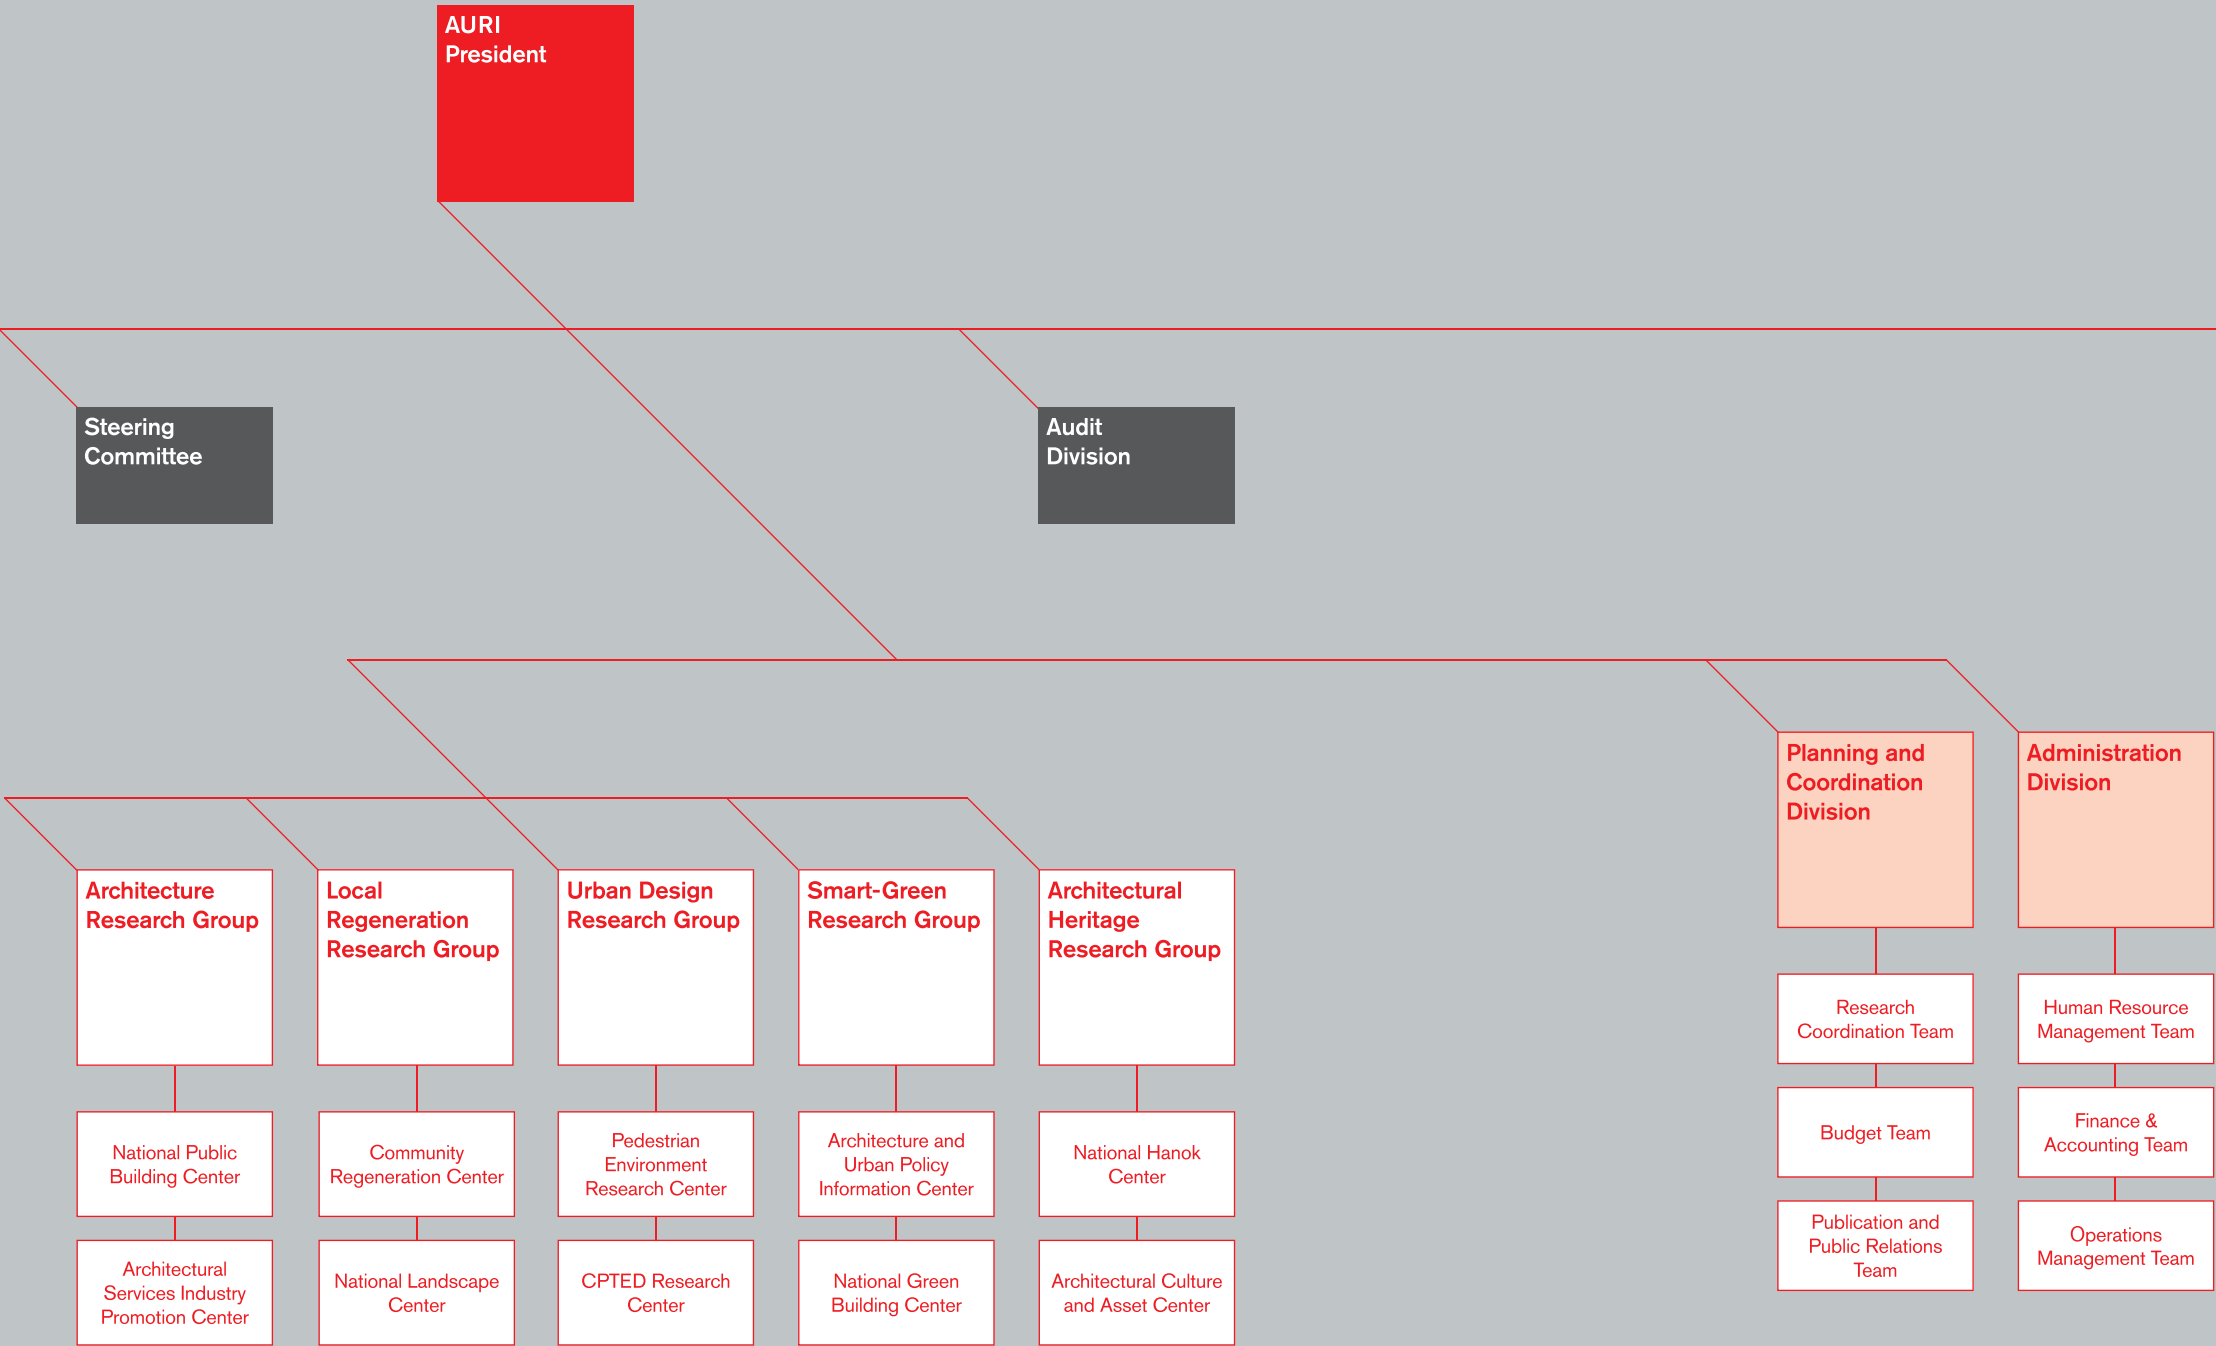

A Study on Legislation for Improvement of Fire Safety Performance of Existing Buildings(2018)

# Organization

## Research Groups and Areas of Expertise

Architecture Research Group

National Public Building Center

The National Public Building Center aims to enhance the design and management of public buildings in order to allow for the enjoyment of a sophisticated architectural culture in daily life. The National Public Building Center supports public buildings that are managed by the central government, local governments, and public institutions through the application of an innovative design process.

Architectural Services Industry Promotion Center

The Architectural Services Industry Promotion Act was enacted in order to enhance the foundations for the architectural services industry to improve public convenience and the national economy. Architectural Services Promotion Center aims to promote policies for the development of architectural services to the level of other advanced countries and to become internationally competition.

Local Regeneration Research Group

Community Regeneration Center

Supports local research regarding the development of urban regeneration and leads research into effective action plans for regional regeneration, the development of public-private cooperative (PPP) regeneration protocols and systems, and initiatives which create jobs at small to mid-size cities' regional management companies.

National Landscape Center

Constructs and manages a national landscape management system which performs research and surveys in order to create beautiful and pleasant national landscapes, establish various public policies, operate businesses, reform laws, and give consultations.

Urban Design Research Group

Pedestrian Environment Research Center

The Pedestrian Environment Research Center conducts theoretical and political research regarding pedestrian environments and behaviors in order to create pedestrian-oriented architectural and urban spaces and vitalize pedestrian activity. This center conducts research on legislative improvements that would promote pedestrians' rights through the proposal of new principles and evaluation standards that would help create pedestrian friendly environments.

CPTED Research Center

The major roles of the CPTED (Crime Prevention Through Environmental Design) Research Center are to provide systematic support for the policies of the central and local governments and to implement studies in anticipation of continued macroscopic trends of the CPTED. This center aims to create safer, crime-free architectural and urban environments.

Smart-Green Research Group

Architecture and Urban Policy Information Center

This center provides policy support for smart city services, analytic services for policy trends, and nation-scale big data analytics. Also, it runs the AURUM policy information service, and the AURIC full-text service for research papers which provides an academic foundation for policy researches.

National Green Building Center

The NGBC in AURI conducts policy support and research on architectural and urban policies in accordance with the wide-scale agenda on new climate regime as determined by the UN, including greenhouse gas mitigation, climate change adaptation, disaster loss and damage minimization efforts. The NGBC in AURI has been designated as one of the National Green Building Centers by the “Green Building Act” since 2013.

Architectural Heritage Research Group

National Hanok Center

The National Hanok Center is a think-tank promoting the preservation and revitalization of Korea's traditional architecture style, the Hanok. The center fosters awareness of the cultural value of Hanoks both internationally and domestically, and carries out relevant research in support of governmental policies. In addition, the center provides residents and private companies with information on related statistics and government policies.

Architectural Culture and Asset Center

The Architectural Culture and Asset Center proposes and conducts research to develop the architectural culture of Korea, create a sense identification for local communities, and enhance the value of architectural cultural assets. For this goal, the Center has built a database of architectural cultural assets, operates an information service system with the database, supports education and promotional activities regarding architectural cultural assets, and makes governmental policy suggestions.

Audit Division

This division reviews issues related to improving the management achievements of the institute; in its supervisory role, they review the overall work as well as accounting issues for the efficient operation of the institute.

Planning and Coordination Division

This division works for the overall planning, coordination, management, and support work to better contribute to development of national policies and to carry out research projects more effectively. They also strategize ways to develop the institute and promote its research results.

- Research Coordination Team
- Budget Team
- Publication and Public Relations Team

Administration Division

Duties include managing general affairs, personnel, and accounting; receives recommendations, and carries out administrative tasks pertaining to the entire institute such as management of the facilities. They also support effective operation of the institute by implementing related regulations.

- Human Resource Management Team
- Finance & Accounting Team
- Operations Management Team

Expanding Global Prominence

AURI forms a cooperative network with related organizations both at home and abroad to share research expertise and data results for the purpose of conducting converged and hybrid research that makes the best use of our research achievements.

Cooperative Network

## AURI as a Communicative Institute

AURI operates various channels linking experts with the public for enhanced construction of architecture and urban spaces, and to serve as connective forums between colleagues. The institute aims to shape the future of architecture and urban spaces through communication and exchange of ideas.

### Forum & Seminars

#### The AURI Architecture and Urban Forum, Debate on Architectural Culture

AURI is the host of the Architecture and Urban Forum, where experts and ordinary citizens participate in discussions of political and social issues in the field of architecture and cities. The Debate on Architectural Culture is also held with panels composed of experts in the field of architecture, culture, and the press.

#### The AURI Hanok Forum

The Hanok Forum invites ordinary citizens, experts, and students to share thoughts about policies related to Hanok and Hanok culture.

#### International Seminars

AURI hosts international seminars where foreign government agencies and research institutions are invited to share policies and best practices of each country.

#### Seminars of the Research Network for Architectural and Urban Policies

A total of 15 research institutions working for regional development gather to share major research results and discuss current policy issues.

Regular Publications

Architecture and Urban Spaces

A journal specializing in discussion of policies, it covers current policy and social issues in the field of architecture and cities and presents a variety of information, perspectives, and political editorials.

The AURI brief

An issue paper on current policies, future prospects and suggestions for improvement based on ongoing AURI research projects.

The Hanok Policy brief

An issue paper centered around Hanok-related policy issues, it provides relevant suggestions based on Hanok Research Center's research and study.

On-line Channels

The AURI Website

It provides e-book services of AURI's publications such as research projects, research reports, regular publications, and other materials. It also runs infographics and a Q&A section.

[www.auri.re.kr](http://www.auri.re.kr) (KOR)  
[www.auri.re.kr/eng](http://www.auri.re.kr/eng) (ENG)

Facebook

AURI closely communicates through Facebook, providing information about publications, seminars, card news, etc.

[www.facebook.com/auriinfo](http://www.facebook.com/auriinfo)

AURI News Letter

It is provided bi-monthly to inform people of AURI's publications, events, and so on.

Membership Guide

When you sign up for materials and mailing services from AURI, you will be provided with publications in a wide range of forms.

## Research reports

### 2007

- Humanistic Research for Architectural and Urban Policy(I)
- A Foundational Survey to Manage Policy Directions Concerning Architecture & Urban Spaces
- A Study on the Demand for Architectural and Urban Research
- Preliminary Study on Directions to Realization of Korean Urban Space
- A Study on the Concept and Current Issues of Urban Public Space
- Promotin Plans and Proposing Policies for Raising Values of Public-Building
- The Current Status and Overseas Cases for the Architectural and Urban Information and Record Management
- Strategic Research for Development of AURI

### 2008

- Humanistic Research for Architectural and Urban Policy(II)
- Study on Korean Urban Design Paradigm
- Research on Integrating Strategy with Public Architecture for Raising Values of Place
- How to Strengthen Architectural Identity ; Through A Comparison of Japanese and Korean Small Architecture
- A Study on Improvement of Systems for Comprehensive Urban Public Space Planning
- Evaluation of Public Spaces as Catalyst for Urban Regeneration
- Study on Establishment of Directions to Architectural and Urban Spatial Policy in Consideration of Qualitative Features
- A Fundamental Study on the Contemporary Publicness of Architecture & Urban space
- The Policy Strategy for Building Architectural and Urban Space Archives in Korea
- Study on Methods of Building a Local Based Support Network for Architectural and Urban Programs and Revitalizing Its Coordinator Function
  - Focusing on Support System Construction For Capacity Strengthening of Local Governments -
- A Survey and an Encouragement Strategy on Architectural and Engineering Services Industry
- Understanding and Application of Design for Better Built Environment
- Promoting Plans and Proposing Policies for Public Relations of Korean Architecture

### 2009

- The Study on Management Strategy with Public Buidings for Efficient Creation
- Design Guidance for 'Urban-Housing'
- A Study on methods of establishing a master plan for public space as a strategy for urban revitalization in small and medium-sized cities
- Proposal of an <Open space assessment model> as a tool for the effective planning and management
- A Study on Urban Regeneration Utilizing Historic Buildings of Korean Modern Times
- A Study on Archiving and Using Method of Architect Data
- Diversification of Housing Renewal Method for preservation of existing tissue
- A Study on Improving the Design Quality of Public Buildings with Indicator Development
- Multidimensional evaluation system for predestrian environment
- A Study on Strategy and System to Achieve a Well-Designed School Building
- A Study on the Urban Design Methods for the Environment-Friendly Neighborhood Development
- Urban and Architectural Rephrase of the Discourse on Ubiquitous Space
- Encouraging Citizen Participation in the Process of Townscape Planning
- Administration Support to Improve design Management of Public Buildings
- Guideline for Performance Management of the Fundamental Plans on Architecture Policy
- A Study on the Directions for a Intergrated Design Guideline of the Kindergarten
- A Basic Research for Using School Buildings As Center of community Facility : Focusing on Elementary School Complex Facility by Remodeling

### 2010

- A Study on the Design Quality of Public Buildings with Indicator Management system
- Establishment of Architectural Process Design Guideline for Public Office Buildings
- Support policy of housing management and renewal for neighbourhood regeneration
- Reasonable Implementation Strategy for U-City
- A Study on the Urban Planning and Design Principles on Riverfront
- Design Improvement for Urban Housing : focusing on methods for system improvement to secure diversity in design for apartment house
- Policy Directions for Apartment Design Mitigating Greenhouse Gas Emissions
- A Study on the Legal System Improvement of the Architectural Services Industry for Green Growth
  - Focusing of the Industrial restructuring Towards the Knowledge Services Industry -
- A Study on Methods for Infrastructure Design Improvement : Focusing on Directions for Transport Infrastructure Design
- A Study on Effective Operation of Special Architectural Distric
- Diagnosis on the Planning Situations for the Urban Lifestyle Housing - Focused on Complex Type Multiplex Housing -
- A Survey on the Basic Environment for building Architecture and Construction Information Systems
- A Study on the Directions for Space Environmental Design of Child Care Facilities Based on the User Centered Theories
- A Fundamental Study for the Amendment of Building Act
- A Study on a City-specific Building Height Management for Landscape Improvement
- A Study on the Establishment and Application of the Assessment for Environment-Friendly Neighborhood Development(I)

### 2011

- Characterization of Housing Culture and Direction of Housing Policy Implication
- How the Korean Urban Design Practice adopted the Western Urban Design Theories
- The Role of Public for Imprving Public Interest in Residential Neighborhood Regeneration
- Study on the Residential Renewal to respond to Urban Spatial Tissue
- A Study on ways of urban design for waterfront cityscape in response to urban regeneration
- Planning and Building Regulations as the Urban and Architectural Form Determinant : The Issues and the Improvement Measures
- A Handbook for Urban Public Spaces in Daily Life : Design Examples of Good Urban Public Spaces
- Public Architecture and Public Space Utilization towards Urban Regeneration of Small and Medium-sized Cities
- The Action Plan on the Built Environment Education for Expanding the Base of Architectural Culture
- Provision of Improved Accessibility and Availability of Neighbourhood Faciilities in Detached Housing Area
- The Legislative Study on the Acts of Architecture
- Understanding the Design of Transport Infrastructure - Focusing on Roads, Railways, Transit Complex and Marine Port
- Establishment of Systematic Basis for Activation of Green Building
- A Study on the Enactment of Architectural Service Promotion Act
- Policy Support Plan of Happy Environments for Child-raising(Happy Child)
- Strategy for Revitalization of Housing Renewal through Adjustment of the Existing Urban Fabric
- A Study of Building Performance Evaluation and Legal System Improvement of Perimeter Block Housing
- Urban Design Strategy for Detached Housing Area in New Towns
- A Study on the Establishment and Application of the Assessment for Environment-Friendly Neighborhood Development(I)
- The Establishment and Operation of the National Public Architecture Center(I)
- Plan for Surveying and Informatization of Hanok Housing Status
- A Study on Legal System Improvement and Supporting Policy for a Han-ok Revitalization
- A Study on the Design Method of Historical Landscape in Hanok-village Related with Government policy
- A Study on the Policy Measures for Provision of the Han-Style Public Buildings
- A Report on Trends in Han-ok Policy and Han-ok Industry

Research reports

2012

- An Enhanced Institutional Operating System for Street Housing-led Housing Renewal
- Strategy for Improving National Building Statistics and Policy Application of Architectural Administration Information
- Neighborhood Regeneration Policy Proposal on the Revitalization and Reclamation of Vacant Urban Spaces
- A Study on the Application of Low Carbon Planning Elements in Urban Environment Improvement Projects
- A Study on Support System Establishment for Maintenance and Management of Low-rise Housing
- The Improvement of System on Privately owned Public Space for Elevation the Quality of Urban public Spaces
- A Study on the Example Application and Institutionalization of the Design Quality Indicator and Management System for the Public Building
- Urban Design for Vibrant commercial Streets : Value of Spatial Linkage between Building and Street
